

# Take your tank inventory to the next "Level"

with TGSoft™ and MTG® (Multi-function Tank Gauge)

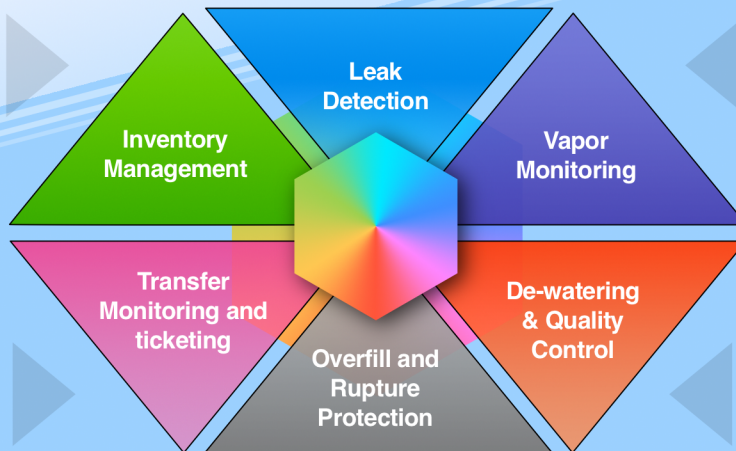

TGSoft - an integrated tank monitoring solution that can harness the most powerful tank gauge available - MTG. With this combination of software and hardware - anything is possible!

On-premise, Cloud configurations, or any combination (hybrid)

Share data over MQTT, AWS, IFTT, OPC and others

Cutting edge browser based User Interface and control

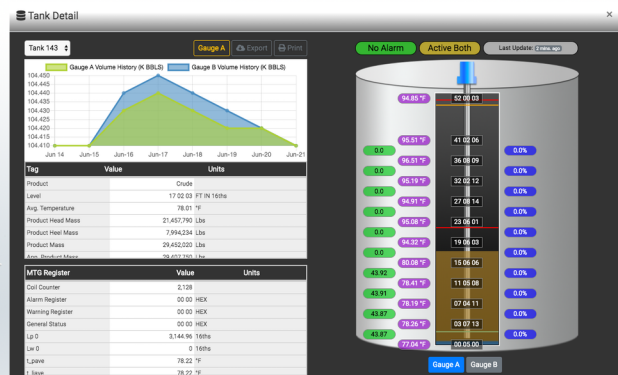

Full Historical data collection and reporting to ERP

Manage multiple locations using virtually any device

Realtime notifications and alarms via email or SMS, seamless connectivity to existing SCADA systems

Full support for all MTG data, including raw, measured, and calculated:

- Product quality & quantity, Liquid stratification,
- Historical data logging & diagnostics,
- Volume, Mass, Level,
- Multi-point spot or Avg. Temp.,
- Multi-strata or Ref. Density,
- Total Water (Free, Emulsified, Entrained),
- Vapor (Pressure, Temp., & Density),
- Ambient (Pressure, Temp., & Density)

\* MTG 3012 configuration shown.
