

Low Cost Mechanical Tank Gauge

GSI 2550 Magnetic Level Gauge

The GSI-2550 is a low cost mechanical tank gauge for tanks 18 feet in height or smaller. The gauge is a closed system and is not affected by exposure to vapors or product while the tank is in service. There are no guide wires, tapes, top or bottom anchors, thus, no in tank servicing required. The GSI 2550 is equipped with the GSI Dual Calibration Assembly (DCA).

The GSI-2550 is designed for applications such as production tanks, chemical tanks, additive tanks, sumps, boilers, fuel oil tanks, small marketing tanks (jobbers), field / fleet tanks, etc. Limit Switches, Analog Transmitters, and Digital Transmitters can be mounted to the gauge to provide electronic readout and/or control. The only limitations to the GSI- 2550 Gauge are tank heights in excess of 18 feet, the top flange must be between 8 to 12 inches (6 inch Donut Canister Float or 10 inch Donut Float), product with metallic particles (some applications), or extremely viscous products (consult GSI).
