

# The MTG 3018 Redundant Tank Gauge provides Full Volume Measurement and Overfill Protection

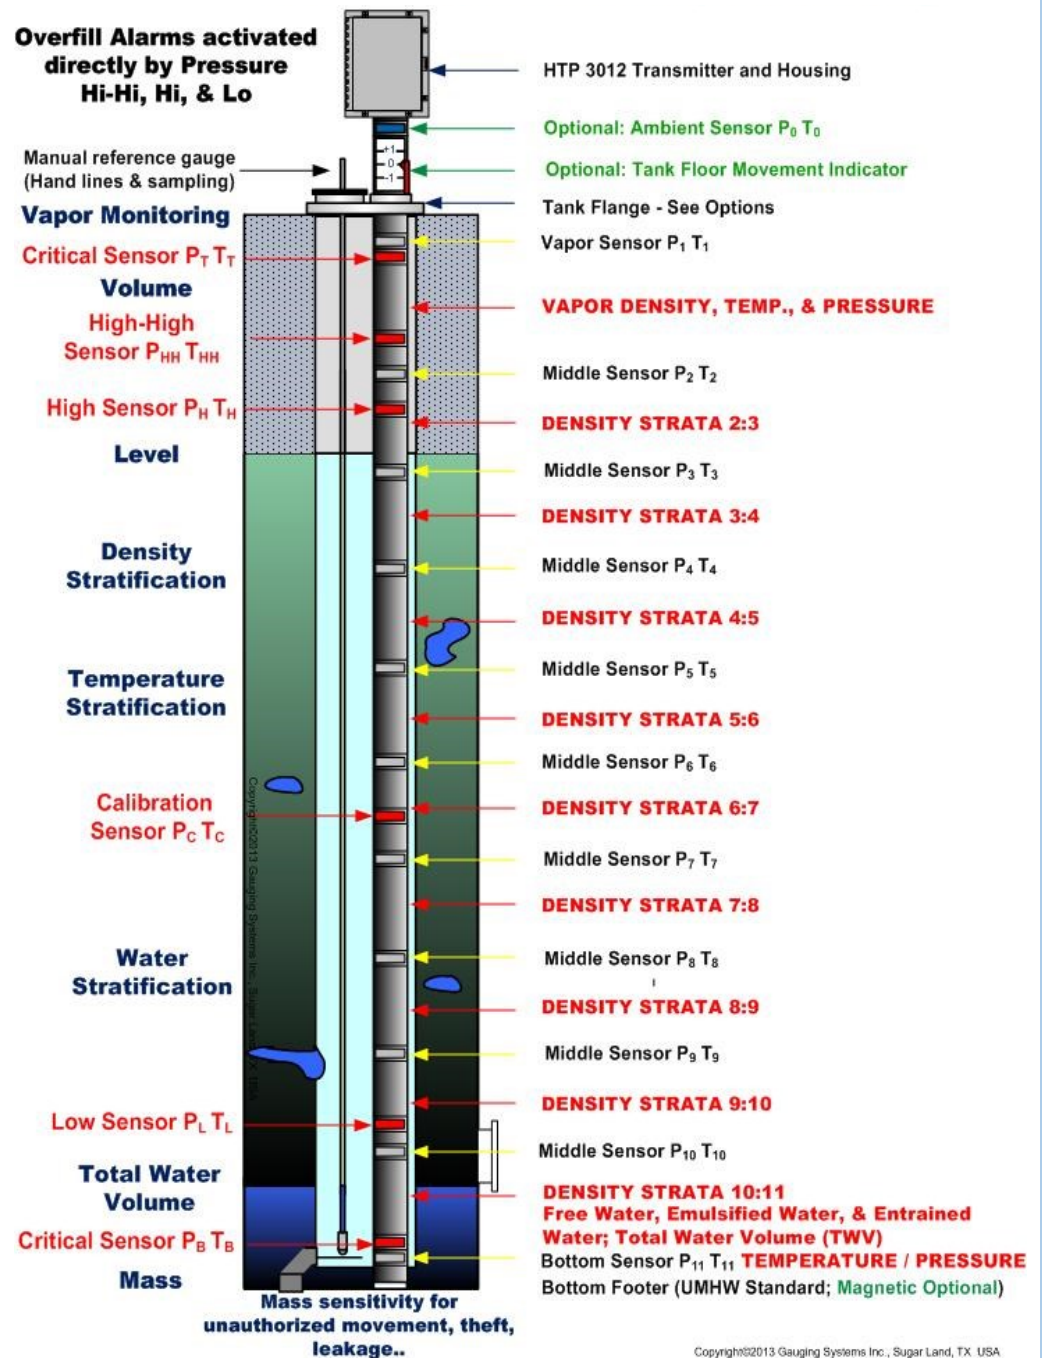

from one probe, one tank opening, with or without gauge well. I.S. Certified, Bottom referenced, and No Moving parts.

## MTG 3018

The MTG "Multi-function Tank Gauge" provides more reliable data and the lowest cost of ownership of all "Custody Transfer" tank gauges on the market.

MTG customers experience both economic and operational benefits from its multiple functionality and the amount of usable data it has to offer, typically seeing payback on the MTG within the first year of operation.

The MTG 3018 provides real time tank gauging data, and direct measurement of High-High, High, Low, and Low-Low alarms. The MTG 3018 consists of completely independent MTG 3012 volume tank gauge and MTG 3006 overfill protection instrument in one 2" probe. With each MTG having fully independent sensor arrays and transmitter cards, i.e., no antenna's to share or additional instruments.
